Dear PediPlace,

It is with sadness that we sent a request of all medical records for my boys. We now have private insurance and are changing to a provider who accepts it. When we moved to Texas in the spring of last year, we could not afford private insurance and were not eligible for state coverage either. We had little to no healthcare choices for our children. PediPlace was an answered prayer as our youngest was placed in the Healthy Babies Program, and our other son was able to be seen on a cash basis. You all were the only place who offered us these services. As a mother, one of my main concerns was "who is going to care for my children when they are sick" (and when they are well e.g. vaccinations, etc.). You all did this for us when we had no other options, and you did it so well. Every interaction that I have had with each of you has been pleasant, professional, and kind. Our provider, Ms. Mwangi, impressed me from our very first visit. She was patient, gentle, inquisitive, and thorough. She has done an outstanding job caring for our family. Thank you to everyone who fit us in for the many sick appointments that we have made and the well appointments too. Your smiling faces and caring hearts have touched us, and we will miss you greatly.

Sincerely,

Hannah
HEALTHCARE CRISIS

According to the Annie E. Casey Foundation’s 2019 KIDS COUNT Data Book, nearly 146,000 Texas kids lost Medicaid or CHIP insurance last year. PediPlace provides healthcare services even if a family is unable to pay. This year, we expect to provide health care to over 7,000 children.

PediPlace provides primary pediatric health services to 7,059 uninsured children and children with Medicaid and Children’s Health Insurance Program (CHIP) benefits.

We welcomed 1,694 new patients living in 86 North Texas Cities.

We provide quality healthcare and reduced community healthcare costs to underserved children who would otherwise unnecessarily use the emergency room.

In addition to wellness exams and sick care visits, PediPlace helps patients acquire financial assistance for laboratory tests and prescription medications as well as specialized care for chronic or behavioral conditions.

95% of patient families identify PediPlace as their medical home.

PediPlace ranks in the top quartile with 64% of patients 12 years and older receiving a well-exam.

85% of patients are able to schedule a "sick" visit the same or next day.
